Bellevue Gold (ASX: BGL) (“**Bellevue**” or the “**Company**”) is pleased to announce the launch of a fully underwritten institutional placement of new fully paid ordinary shares (“**New Shares**”) to raise approximately A\$100 million (before costs) (“**Placement**”) and a non-underwritten Share Purchase Plan to raise up to A\$20 million (“**SPP**”) (with the Placement and SPP collectively the “**Equity Raising**”).

In conjunction with existing cash on hand, proceeds of the total Equity Raising will be used to grow resources and accelerate development of the Bellevue Gold Project in WA.

This two-pronged strategy includes:

- Ongoing Resource growth and discovery drilling through step out, infill and discovery drilling from surface and underground platforms;
- Re-establishing access for mechanised re-entry to underground and drill platforms for infill and extensional drilling and future production haulage;
- Underground mine development, developing the production decline to both Viago and Deacon lodes for mining and other underground infrastructure, including ventilation rises and power upgrades;
- Non-process infrastructure including camp, road upgrades, power and communication upgrades; and
- General working capital requirements and offer costs.

The Equity Raising follows the release of Bellevue’s maiden Indicated Resource on Tuesday 7 July 2020 and recent Bellevue Project Update on Friday 26 June 2020,² key highlights of both announcements included:

- Maiden Indicated Resource of 860,000oz @ 11.6 g/t gold;
- A high-grade core of 480,000oz at 15.5 g/t gold that remains open in all directions and sits within close proximity to existing underground infrastructure;
- Indicated Resource drilled on 40m x 40m and 40m x 20m or better drill spacings;
- Stage 2 drilling underway to upgrade and grow the 2.3Moz Resource in parallel with project development work in 2H CY20
- Further increase to Indicated Resource planned for the December 2020 quarter;
- Recoveries averaging 97.8% including exceptional gravity only component recovery from lodes with results ranging from 73.6% to 91.7%; and
- Industry recognised mining consultant, Entech Pty Ltd, has been appointed as Study Manager to assist with ongoing studies to advance the project.

Bellevue Managing Director Steve Parsons said: *“This proceeds from the raising will help ensure we can unlock the full value of what is clearly an exceptional asset with extremely high grades and immense scope for further inventory growth.*”

“By implementing our dual exploration and development strategy, we will seek to maximise our ability to create value for shareholders through both resource growth and project development.”

The Bellevue Gold Project represents a unique, high quality asset and investment opportunity, its high grade (10.0 g/t), location in a tier-1 jurisdiction with access to existing infrastructure and the continued upside potential at the project which we aim to demonstrate by simultaneously increasing our Indicated Resource and growing the Global Resource at the Project.

² All material assumptions and technical parameters underpinning the Mineral Resource estimate (7.03Mt @ 10.0 g/t gold for 2.3M ounces of gold) in the ASX announcement titled “Bellevue Gold – Maiden Indicated Resource 860,000oz at 11.6g/t gold” and dated 7 July 2020 continue to apply and have not materially changed since last reported. The Company is not aware of any new information or data that materially affects the ASX announcements of 26 June 2020 and 7 July 2020.
